OBJECTIVE

Looking for a challenging role in an organization to utilize my technical, database and management skills for the growth of the organization as well as to enhance my knowledge and skills about new, exciting and emerging trends in the field.

EDUCATION

Bachelor of Engineering (B.E) (pursuing)

Computer Science and Engineering (2016-2020)

SIPNA COLLEGE OF ENGINEERING AND TECHNOLOGY, AMRAVATI

CGPA/SGPA: 7.84/10 (Current)

XII (Senior Secondary), Vocational Science

Year of Completion: 2016

MAHARASHTRA STATE BOARD

Percentage: 74.62 %

X (Secondary)

Year of Completion: 2014

MAHARASHTRA STATE BOARD

Percentage: 90.20 %

TECHNICAL SKILLS

Languages	Python, C#.Net, Core Java, Core C++
Web Technologies	HTML5, CSS3
Framework	ASP.Net, Django
Database	MySQL
Tools	Git, GitHub, Visual Studio 2017-19, Microsoft SQL Server
Current	Machine Learning, Deep Learning, Neural Networks with Python (NumPy, Pandas, Scikit-Learn, Matplotlib, TensorFlow, OpenCV)

NON-TECHNICAL SKILLS

Office Productivity	Microsoft Office Suite (PowerPoint, Excel, Word)
Languages	Fluent in English, Hindi, Marathi, Gujarati Appeared for JLPT (Japanese language proficiency test) N5 level

---

AREA OF INTEREST

Machine Learning, Deep Learning, Neural Networks, Computer-Vision, Data Science, Self-Driving Cars.

SUBJECT OF INTEREST

Object Oriented Programming (OOP)

Database Management Systems (DBMS)

INTERNSHIPS

Machine Learning (Sentiment Analysis using Python and Neural Network)

College of Engineering, Pune (1st June – 1st July 18)

A machine learning model was created to analyse the sentiment of given data/tweets by training and testing the data by using neural networks.

MAJOR PROJECTS

Self Driving Car (Simulation)

Machine Learning, Deep Learning, Neural networks, Keras, Python

Created a fully functional self-driving car fuelled entirely by Deep Learning and trained by using machine learning and convolutional neural networks. The car is fully capable of running on its own and is able to identify lane lines and various traffic signs by using Convolutional neural networks and is trained by using Keras and simulated by using Behavioral cloning.

Banking System

C#, ASP.Net, HTML, CSS, Bootstrap, JavaScript

All the functionalities of database in a banking system are credited into this project. The application was built by using Bootstrap, HTML, CSS, JavaScript and the backend was handled by C# and ASP.net. In this application, users can register by creating an account, send money, check transactions/funds/passbook and also facilities of fixed deposits and credit card handling were given.

MINOR PROJECTS

Machine learning Projects (MNIST Handwritten digit Classification, Iris flower Classification, House Price Prediction, Sentiment Analysis)

A fully functional website using HTML, CSS, JavaScript, PHP (Team)

A customer service chatbot using python & Natural Language Processing

Mobile based student feedback system using .NET

ACHIEVEMENTS

University Colour Coat Holder (2018-19)
Won a Colour Coat for Elocution and represented College at Akola, University at Nashik and Central Maharashtra at Odisha for the same.

Won a number of Debate, Elocution and Open Mic competitions.

Won my first coding competition in class 4^{th} for creating a human heart design in a language called LOGO.

PERSONAL ASSETS

Fluent in communication, Flexible and Adaptive, Leadership, Strong analytical and problem-solving skills, Multi-tasking ability and the hunger to always learn and explore.

PERSONAL PROFILE

Father's Name	Kishore Shah
Mother's Name	Veena Shah
Date of Birth	October 30, 1998
Nationality	INDIAN
Languages Known	English, Hindi, Marathi, Gujarati, Japanese
Current Position	PRESIDENT, Computer Society of India (CSI) - SIPNA COET (2 years)
Hobbies	Writing Poems and Stories, Cricket, Hiking, Reading, Listening Songs.

I hereby declare that all the information given above is to the best of my knowledge and belief.

Place: Amravati
Date:
